Butomau Artsiom

Date of Birth	28.09.1993 (29 y.o)
Contacts	butapro7@gmail.com (E-mail)
	+995551129811 (mobile)
Location	Georgia
Relocation	Ready to Relocate
Goal	Applying for a position "Java Backend Developer"

Education
Bachelor

	2011-2015	
	High Education	Saint-Petersburg National Research University of Information Technologies, Mechanics and Optics
	Faculty/ Specialization	Informational technologies and Systems, Informational Systems

Incompleted Master

	2015-2016	
	High Education	Saint Petersburg National Research Academic University Of The Russian Academy Of Science
	Faculty/ Specialization	Software Engineering

English	**B1+**
Stack	**Java, Spring Boot, JPA, Hibernate, SQL, Kafka, Redis, AWS (S3, IAM, EC2, SNS, Fargate), CI/CD, SonarQube, Jaeger, React, Angular, Python, Bash, ChatGPT, Copilot**

Period of work 02.2019 – for now	Company	EPAM Systems
	Employment	Fulltime
	Position	Key Software Developer
	Stack	Java 7/8/11/17, Kotlin, Spring Framework, Spring Boot, AOP, WebFlux, Tomcat, Netty, ivy, Maven, Gradle, Oracle, Postgres, RabbitMQ, Kafka, SQL, PL/SQL, JPA, Hibernate, JOOQ, JDBC Template, REST API, Excel API, Quarix, XML/JSON, JMC, JConsole, VisualVM, Kibana, Veracode, Jaeger, SonarQube, TypeScript, JavaScript, Angular, React, JQuery, CI/CD, Openshift, Kubernetes, Docker, Scrum, Agile, ChatGPT, Copilot

	Responsibilities and Achievements	- Developed beta in 3 weeks - Supported issues on client's side - Reduced the support requests by ~75% - Helped devops team to migrate 10+ services to Kubernetes - Developed and maintained 6+ services - Redesigned rusty solution in 2 months and half - Migrated the application to AWS Fargate - Fixed broken ETL pipeline comprised of 10 datasources and 50+ pl/sql scripts - Speeded up slow SQL queries by ~20% - Implemented new UI pages - Applied ChatGPT & Copilot speeded up the work by 200-300% - Migrated to newer Java, Tomcat, Spring, Hibernate versions - Successfully collaborated with DevOps team and other Dev teams - Fixed memory leaks and volunerability issues - Splitted monolith into microservices - Night works
Period of work 08.2018 – 08.2020	**Company**	Fixar Global
	Employment	Part-time
	Position	Software Engineer
	Stack	Python 3, PyQt, PySide, Reportlab, matplotlib, numpy, pandas, gRPC, proto, C++, Electron, Node, Typescript, webpack
	Responsibilities and Achievements	- Designed and implemented the flight express analyze tool - Analyze result and reports are generated in less than 1 minutes - Application helps pilots to decide to run the flight again or accept the results - The tool finds the clouds in sources images - The tool works without access to Ethernet
Period of work 10.2015 – 08.2018	**Company**	Geoscan
	Employment	Fulltime
	Position	Software Engineer
	Stack	Java, Guice, Jetty, Spring Boot, Vaadin, eclipse, emf, Hibernate, PostgreSQL, Mongo, REST API, Consul KV-Storage, AWS IAM, Unit Testing, Microservices, Elasticsearch, Kibana
	Responsibilities and Achievements	- Tuned up the cluster of distributed calculations - Took part in SaaS development - Developed the service of cluster's nodes monitoring - Developed the service of management of cluster's nodes

Additional info   Have a successful experience in development of 10+ commercial products. Played a Key Developer / Team Lead positions. Leaded a command comprised of 2 developers. Participated in the project architecture designing and interacted with customers. I spent my free time studying T-shaped technologies. Fond of sports and adventures.

Have hearing issues.
